PHILOSOPHICAL MAGAZINE LETTERS, 2000, VOL. 80, NO. 12, 813–816

SUBJECT INDEX

Vol. 80

PAGE

Ag films, novel duplex antimicrobial 249
Al–Co–Ni, stable one-dimensional quasicrystal related to 107
Al–Cu–Co, thermal expansion of quasicrystalline 49
Al–Cu–Ru–Si, new cubic approximant phases in 73
Al–Ni–Co decagonal quasicrystal, columnar clusters in 653
Al–Ni–Ru, highly ordered quasicrystal of 157
Al–Ni–Y glassy alloys, nanometre corrosion in 85
Al–Pd–Mn quasicrystal approximant, bending experiments on 11
Al–Pd–Mn quasicrystal, study of micropits formed by etching of 307
Al–Pd–Mn, stability of F2 phase 205
Al–Pd–Mn, thermal expansion of quasicrystalline 49
Al–Pd–Re system, production of quasicrystals in 495
Al–Si alloys, aluminium precipitates in 477
Amorphization of cubic zirconia by caesium-ion implantation 341
Amorphous alloy, Al-based, crystallization behaviour of 349
Amorphous Fe–Si–B–Cu alloys, crystallization of 57
Amorphous hydrogenated silicon, low-temperature H evolution from 647
Anodic etching of an Al–Pd–Mn quasicrystal; formation of micropits 307

Ball milling of SiC, $\alpha \rightarrow \beta$ polytypic transformation in 333
$BaTiO_3$ epitaxial films, HREM investigation of stacking faults and nanotwins in . . 371
$BiSbTe_3$, crystal growth and defect study of 435
Bubble sorting in a foam under forced drainage 41
Burgers vector of dislocations in icosahedral quasicrystals 281

Carbon nanotubes; microstructural evolution under electron irradiation 427
Carbon, HREM study of microporous 381
Carbon, energy, compressibility and covalency in subgroup of 125
C–N compound, atomic and electronic structure of 585
Composite, crack roughening in a brittle 165
Cottrell atmospheres in FeAl by atom-probe FIM 725
Cr–40 at.% Al alloy, ω-phase formation in 703
Crack roughening in anisotropic brittle composite 165
Cracks in strained In–Ga–P films 535
Cross-slip in GaAs and InP at elevated temperatures 511
Crystal growth and defect study of $BiSbTe_3$ 435
Crystallization of Fe–Si–B–Cu alloys 57
Cu bicrystal, interactions of slip bands with grain boundary in 149
Cu, dislocation arrangements in 525

Damping anomaly in yttria-stabilized tetragonal zirconia 325
Deformation bands in fatigued copper 525
Deformation of Ti–Al alloy; stacking faults 19
Dewetting, reactive solid-state 33
Diamond, characterization of luminescence in 441
Diffusion by dumb-bell mechanism in random bcc alloy 65
Diffusion by vacancy pairs in intermetallic compounds 569
Dislocation arrangements in fatigued copper 525
Dislocation dissociation and stacking-fault energies in GeSi alloys 193
Dislocation forest in bcc lattices, flow stress contribution of 199
Dislocation in icosahedral quasicrystals, Burgers vector of 281
Dislocation loops, nucleation under stress of 605

Dislocation networks, electron microscopy of grain-boundary 453
Dislocation subboundaries; toughening of brittle material 461
Dislocations in $SrTiO_3$, TEM study of 597
Disordered semiconductors in rapidly solidified CrAl alloy 691

Elastic–plastic impact study of the restitution coefficient in 549
Electrical resistance measurements of crystal growth in amorphous $FeZr_2$ . . . 797
Electrical resistivity of quasicrystals in Al–Pd–Re systems 495
Electron channelling contrast imaging to assess near-surface damage 395
Electron diffraction study of approximant phases in Al–Cu–Ru–Si 73
Electronic and atomic structure of a carbon nitride compound 585
Electrostrictive coefficients of relaxor-based ferroelectric ceramics 445
Epitaxial Ni–Al films on NaCl 719
Epoxy, mechanical properties of open-cellular 215
Eshelby tensor in inclusion problems 367

Fatigue cracking; relationship with grain-boundary category 483
FeAl, boron-enriched Cottrell atmospheres in 725
Fe–Cu alloy, 9R copper precipitates in 137
Fe–Mn–Si based shape-memory alloys, martensite formation in 745
Ferroelectric ceramics, electrostrictive coefficients of 445
Fe–Si–B–Cu–Nb (–X) alloys, thermomagnetic study of devitrification in 359
$FeZr_2$ alloy, crystal nucleation and growth in amorphous 797
Field-ion microscopy, investigation of Cottrell atmospheres in FeAl 725
Flow behaviour in layered T_3SiC_2 ceramic 289
Flow stress contribution of dislocation forest in bcc lattices 199
Foam coarsening under forced drainage 419
Foam, bubble sorting in 41
Fractal growth of graphite nodules in iron 633
Fracture mechanisms of symmetrical tilt grain boundaries 229

GaAs and InP, cross-slip in 511
GeSi alloys, dislocation dissociation and stacking-fault energies in 193
Grain boundaries, fracture mechanisms of symmetrical tilt 229
Grain boundary category; relationship with fatigue cracking 483
Grain boundary groove profiles in tungsten 627
Grain boundary, interactions with slip bands in Cu bicrystal 149
Grain-boundary diffusion in submicrocrystalline metals 221
Grain-boundary dislocation networks; characterization by electron microscopy . . 453
Graphite nodules in iron, fractal growth of 633

Heat conductivity in crystals and glasses 807
Hopping in band tails at zero temperature; charge carrier thermalization 777
Hopping transport in disordered semiconductors 691
HREM investigation of stacking faults and nanotwins in $BaTiO_3$ films 371
HREM study of approximant phases in Al–Cu–Ru–Si 73
HREM study of microporous carbon 381
HREM study of steps on lamellar interfaces in TiAlNb alloy 1
HVEM observations of reactions between molten Zn and Fe 187

Icosahedral quasicrystals in Zr–Al–Ni–Cu–Ag metallic glass 263
Impact cracking of solid spheres, high-speed photographic study of 387
Inelastic neutron scattering study of phonons in γ-cerium and δ-cerium 591
In–Ga–P films, surface topography of cracks in 535
InP and GaAs, cross-slip in 511
Interface roughening dynamics in paper-wetting experiments 503
Interfaces between immiscible polymers, kinetics of formation of 561
Interfaces, HREM study of steps on 1
Intergranular stress fields in polycrystalline materials 543

Intermetallic compounds with B2 structure, diffusion by vacancy pairs in 569
Ion implantation of zirconia by caesium; amorphization 341

Liquid impact of lithium fluoride 27
Lithium fluoride, liquid impact of 27
Luminescence in diamond; platelet-related 441

Martensite formation in Fe–Mn–Si based shape-memory alloys 745
Mechanical properties of open-cellular epoxy 215
Metallic glass Zr–Cu–Al–Ni–Ag, grain growth from liquid phase of 79
Metallic glass Zr–Ti–Cu–Ni–Be; phase transitions under pressure 793
Metallic glass, thermodynamic model of nanocrystallization in 401
Metallic glasses Zr–Al–Ni–Cu–M, growth of icosahedral phase in 737
Micropits formed by anodic etching of an Al–Pd–Mn quasicrystal 307
Molecular dynamics study of atom mobility of steps of Si (100) surface 317
Molecular dynamics study of boron implants into a stepped surface 641
Molten Zn and Fe, HVEM observations of reactions between 187
Mo–Si compounds, thermal expansion coefficients of 683

Nanocomposites, Al-based, crystallization behaviour of 349
Nanocrystalline solids, exchange–stiffness constant of 785
Nanocrystallization in metallic glass, thermodynamic model of 401
Nano-icosahedral phase in Zr–Al–Ni–Cu–M metallic glass 737
Nanometre corrosion in Al–Ni–Y glassy alloys 85
Nanoparticles, quasi-two-dimensional or hcp palladium 257
Nanoparticles, spontaneous mixing and unmixing of atoms in 181
Nanoscale interstitial solid solutions, size dependence of critical point in 411
Nb_3Al, stacking faults in 519
Nb–Ti–Al system, new tetragonal phase in 295
Neutron scattering, small-angle; measurement of exchange stiffness 785
Ni alloys, coalescence of γ particles in 669
Ni, strain localization in cyclically deformed 613
Ni–Al films on NaCl using Ag buffer layer 719
Nuclear spin–lattice relaxation in $Ti_{45}Zr_{38}Ni_{17}$ quasicrystals 763
Nucleation and growth of crystals in amorphous $FeZr_2$ 797
Nucleation and growth of nano-icosahedral phase in Zr–Al–Ni–Cu–M 737
Nucleation of dislocation loops under stress 605

Oxide films, sol–gel–hydrothermal growth of 119

Paper-wetting experiments, interface roughening dynamics in 503
Pd nanoparticles, quasi-two dimensional 257
Peierls–Nabarro model revisited 675
Phase transitions in epitaxial $SrRnO_3$ films 271
Phase transitions of Zr–Ti–Cu–Ni–Be metallic glass under pressure 793
Phonon densities of states of γ-cerium and δ-cerium 591
Plastic deformation of icosahedral Zn–Mg–Dy quasicrystals 129
Polymers, kinetics of formation of interfaces between immiscible 561
Precipitates of aluminum in hypereutectic Al–Si alloys 477
Precipitates of 9R copper in Fe–Cu alloy 137
Precipitation at interphase boundaries in Zn–Ag alloy 467
Precipitation of quasicrystalline phase in $Hf_{59}Ni_8Cu_{20}Al_{10}Ti_3$ 621

Quasicrystal approximant Al–Pd–Mn, bending experiments on 11
Quasicrystal of Al–Ni–Co, columnar clusters in 653
Quasicrystal of Al–Pd–Mn, study of micropits on 307
Quasicrystal with ordered body-centred hypercubic lattice 577
Quasicrystal, new ordered form of Al–Ni–Ru 157
Quasicrystal, stable one-dimensional, related to Al–Co–Ni 107

Quasicrystalline phase in $Hf_{59}Ni_8Cu_{20}Al_{10}Ti_3$ 621
Quasicrystals in Zr–Al–Ni–Cu–Ag metallic glass 263
Quasicrystals of $Ti_{45}Zr_{38}Ni_{17}$, nuclear spin–lattice relaxation in 763
Quasicrystals of Zn–Mg–Dy, plastic deformation of 129
Quasicrystals, Burgers vector of dislocations in 281
Quasicrystals, grain growth from liquid phase of metallic glass 79
Quasicrystals, production in Al–Pd–Re system of 495
Quasicrystals, thermal expansion of Al–Pd–Mn and Al–Cu–Co 49

Restitution coefficient in elastic–plastic impact 549
Ruddleson–Popper compounds of SrTiO 173

Shape-memory alloys based on Fe–Mn–Si, martensite formation in 745
Si(100) surface, molecular dynamics study of atom mobility on steps of 317
SiC, $\alpha \rightarrow \beta$ polytypic transformation in ball-milled 333
Silicon, molecular dynamics study of boron impacts in 641
Sintering of cylindrical particles by surface diffusion 755
Slip bands in a copper bicrystal, interactions with grain boundary of 149
Sol–gel–hydrothermal growth of oxide films 119
$SrRuO_3$, phase transitions in epitaxial films of 271
SrTiO, Ruddleson–Popper compounds of 173
$SrTiO_3$, TEM study of dislocations in 597
Stacking faults and nanotwins in $BaTiO_3$ films, HREM investigation of 371
Stacking faults in A15 compound Nb_3Al 519
Stacking faults in two-phase Ti–Al alloy after deformation 19
Stacking-fault energies in GeSi alloys 193
Stainless steel, slurry erosion of 489
Stainless steel, strain-induced submicrocrystalline grains in 711
Steps on Si(100) surface, molecular dynamics study of atom mobility on 317
Strain localization in cyclically deformed Ni 613
Strain-induced submicrocrystalline grains in stainless steel 711
Stress effect on grain-boundary diffusion 221
Stress field of circular Volterra dislocation loop 95
Surface topography of cracks in strained In–Ga–P films 535

TEM study of dislocations in $SrTiO_3$ 597
Thermal expansion coefficients of Mo–Si compounds 683
Thermodynamic model for nanocrystallization in metallic glass 401
Thermomagnetic gravimetric study of crystallization in Fe–Si–B–Cu alloys 57
Thermomagnetic study of devitrification Fe–Si–B–Cu–Nb (–X) alloys 359
Ti_3SiC_2 ceramic, flow behaviour in 289
Ti–Al alloy, stacking faults after deformation of 19
TiAl, structure of a phase induced by Xe irradiation in 661
TiAlNb alloy, HREM study of steps on interfaces in 1
Toughening of brittle materials by dislocation subboundaries 461
Tungsten, grain boundary groove profiles in 627

Vacancy pairs in intermetallic compounds, diffusion by 569
Volterra dislocation loop, stress field of 95

ω-phase formation in rapidly solidified CrAl alloy 703

Zirconia, damping anomaly in yttria-stabilized 325
Zn–Ag alloy, precipitation at interphase boundaries in 467
Zn–Mg–Dy quasicrystals, plastic deformation of 129
Zn–Mg–Er alloy, cubic approximant in 239
Zr–Al–Ni–Cu–Ag metallic glass, quasicrystals in 263
Zr–Cu–Al–Ni–Ag metallic glass, grain growth from liquid phase of 79
Zr–Ti–Cu–Ni–Be metallic glass; phase transitions under pressure 793
